Art Unit: 1623

The reply filed on 11-08-02 is not fully responsive to the prior Office Action mailed 10-10-02 because of the following omission(s) or matter(s): Applicant failed to elect a **single disclosed species for each of ingredients (A)-(F)**. That is, Applicant is required to name a specific "agent" for (A), (C), (D), (E), and (F), and a specific "antioxidant" for (B). See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, Applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

A complete restatement of the election of species requirement appears below. The Examiner regrets that the word "species" was inadvertently omitted from the original statement of the requirement. The word has now been added in bold in the paragraph below which begins, "Applicant is required under 35 U.S.C. 121"

This application contains claims directed to numerous patentably distinct compositions and methods of using them for

Art Unit: 1623

normalizing impaired or deteriorating neurological function.

Each composition comprises at least seven different agents.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed **species** for each of ingredients (A)-(F) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic or subgeneric.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or

Art Unit: 1623

identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Papers relating to this application may be submitted to Technology Center 1600 by facsimile transmission. The number of the fax machine for official papers in Technology Center 1600 is (703) 308-4556. Any document submitted by facsimile transmission will be considered an official communication unless the cover sheet clearly indicates that it is an informal communication.
